DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371 © of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35

Art Unit: 2838

U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1,17 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Madenokouji et al. (U.S. Patent # 6,046,919).

Madenokouji et al. discloses the claimed invention a power converting apparatus (figure 1), including a detector, a controller (column 4, line 5-65 and column 8, line 35-70+).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moriguchi et al. (U.S. Patent # 6,069,811) in combination with Madenokouji et al. (U.S. Patent # 6,046,919) and further in combination with Handleman (6,111,767).

Moriguchi et al. discloses claimed invention dc power supply (figure 1). However Moriguchi et al. does not disclose the utilization of technique for a solar panel power supply, microprocessor

and a technique for a data recording in memory Madenokouji et al. teaches the utilization solar power (figure 1) and Handleman teaches the utilization of similar technique for a data recording in memory (Abstract, line 1-25). It would have been obvious one having an ordinary skill in the art made to modify Moriguchi et al's power supply by utilizing the technique taught by Madenokouji et al. And Handelman for the purpose of reducing cost and improving the efficiency of power supply.
